6.0 HEALTH ALERT!!!

There has been a reported outbreak of cholera in Lusaka. Cholera is an acute infectious diarrhoeal disease characterised by vomiting and diarrhoea. It is caused by eating or drinking food or water contaminated with bacteria that causes cholera.

The outbreak of cholera in Lusaka can easily spread through contact with infected persons.

Everyone is encouraged to observe basic hygiene practices such as washing of hands with soap and water; drinking clean and safe water which has been previously boiled; eat food that is well cooked and hot, and wash fruits and vegetables in clean water if you are going to eat them raw.

Let us all keep healthy and safe!!

Yours faithfully
Lake Road PTA School
